Activity 1

## Part1

The screenshot shows the Visual Studio Code interface. On the left, the 'RUN AND DEBUG' sidebar is open, showing a 'Run and Debug' tab selected. It includes sections for 'Run', 'JavaScript Debug', and 'Debugging Terminal'. The main area displays a file named 'app.js' with the following code:

```
1 console.log("Hello World!");
```

Below the code editor is the 'TERMINAL' panel, which shows the output of running the script:

```
C:\Program Files\nodejs\node.exe .\app.js
Hello World!
```

At the bottom, the 'PROBLEMS', 'OUTPUT', 'DEBUG CONSOLE', 'TERMINAL', and 'PORTS' tabs are visible. The 'TERMINAL' tab is active.

## Part 2
